HomeBuilt Summary Business Plan

Archit Deepak, Krishna Bhatt, Aayush Hegde

I - EXECUTIVE SUMMARY

Mission Statement: To provide an involved remodeling experience free of the hassles of contractors and the confusions of DIY while supporting local businesses and homeowners' wallets.

Problem Overview: Remodeling outdoor spaces is challenging for homeowners, while hiring contractors is costly and uncertain. Meanwhile, small hardware stores struggle to compete with larger chains, leaving them with unsold stock.

Solution: HomeBuilt provides an innovative app for users to design unique outdoor projects using a vast library and the Benji AI assistant, delivering materials and step-by-step instructions while boosting local hardware partners' business and visibility.

Market Analysis: HomeBuilt targets low-to-middle income homeowners in the Bay Area seeking affordable DIY outdoor home improvement solutions, while also partnering with small-scale local suppliers for mutual benefit.

Unique Value Proposition: HomeBuilt provides customizability, affordable pricing, enjoyable installation, and trust to consumers, while offering suppliers amplified visibility, business growth, and an outlet for excess stock.

Revenue Model: HomeBuilt will provide Retail as a Service (RaaS), collecting revenue both from our build packages (~$500/pack with ~27% markup on materials) and supplier subscription fees ($40/month). Additionally, we will collect commissions on transactions.

Growth: Homebuilt has developed its app along with Benji AI and is reaching out to local suppliers. Homebuilt will employ a 5-year growth plan which will lead to an estimated profit of $12,000,000 and 50,000-60,000 active users by the end of year five.

II - PROBLEM

Homeowners: Remodeling outdoor spaces is often daunting for homeowners. Hiring contractors is expensive, time-consuming, and fraught with issues like miscommunication, unexpected costs, and delays. Our pain-probing survey of 200 Bay Area residents found 78% were dissatisfied with contractors, with 54% citing high costs for simple projects as the reason for dissatisfaction. DIY projects aren't much easier—Digital Hub cites only 31% of homeowners complete them successfully. Consumers need an affordable, user-friendly way to transform their outdoor spaces—one that combines personal accomplishment with simplicity, without compromising quality.

Hardware Stores: Local hardware suppliers often face challenges in competing with larger, well-established retailers. Research by VerticalIq shows that the top four firms in the home center sector control over 96% of sales, hindering smaller stores' growth due to limited marketing budgets and visibility, which also leads to excess inventory and wasted resources. BDC reports that excess inventory can incur 20% to 30% in additional costs. Suppliers need an affordable and effective way to showcase their products to the world and gain more sales to turn over unsold stock.

III - SOLUTION

HomeBuilt provides a solution which makes DIY outdoor home remodeling a much more approachable and simpler process.

Introducing the HomeBuilt App: Our solution is the HomeBuilt app, an easy method for users to create their own customized projects with curated materials and instructions. After choosing a starter project from HomeBuilt's extensive library of different designs, users can use Benji, our AI assistant, to customize their design to perfection. We will provide the following customizable renovation options: Fencing, tiling, pet-houses, sheds, doors, landscaping, carpentry, and other projects. After the DIY

Krishna Bhat

design has been completed, HomeBuilt will take it a step further than traditional AR home design apps and provide materials and an easy-to-follow instruction manual. The materials will be sourced from local hardware suppliers that HomeBuilt will partner with, giving them business and a larger market reach.

Consumer's Journey:

IV - TARGET MARKET

Market Analysis: According to the Home Improvement Research Institute, DIY Improvement interest has grown over 14% in the last year. A pain product survey conducted by HomeBuilt showed how 84% of homeowners would be interested in HomeBuilt's service for customizing outdoor DIY projects. This survey was conducted with over 100 different aged and income families, all residing within the Bay Area.

Customer Profile: At launch, HomeBuilt will target customers specifically within suburban and urban areas of the Bay Area.

Consumer Demographics: We will be targeting low to middle income households ($60k to $150k/year). These consumers are typically aged 22-55 years and include physically-abled homeowners.

Consumer Psychographics: In our marketing, we will be targeting budget-conscious individuals who also value personalization and home-quality in their outdoor home improvement projects. These consumers are either frustrated with contractors, motivated to save money during renovation, or excited about DIY home projects. For clarification, HomeBuilt *will not* be targeting consumers who require

Krishna Bhat

large-scale renovation, such as an entire backyard remodeling.

Supplier Demographics: HomeBuilt is looking for small hardware stores ($1k to $10k profit/day) that have high quality products but struggle to compete with big-box competition.

Competitive Analysis: Within the vast industry of home-improvement business, there is no company that offers similar services to HomeBuilt. Currently, no AR design visualization apps provide the customizability or complete support for projects from idea to life. HomeBuilt takes the process to the next level by providing instructions and materials to the user.

V - UNIQUE VALUE PROPOSITION

The Offering: HomeBuilt is a user-friendly marketplace connecting homeowners with local vendors together to create hassle-free home-improvement solutions. Through our app, users can design their ideal project, and we'll deliver materials and step-by-step guidance—making the process as fun and easy as building a LEGO-set. With transparent pricing, affordable rates, quick timelines, and top-notch quality, HomeBuilt replaces the stress of contractors and DIY confusion.

For Homeowners	For Local Stores
Great Customizability Affordable Pricing Enjoyable Installation Trust and Quality	Amplified Visibility Business Growth Outlet for Excess Stock

VI - REVENUE MODEL

HomeBuilt is a two-sided marketplace that connects homeowners with local suppliers.

Build Packs (B2C): Build Packages are pre-packaged DIY landscaping solutions delivered through the app, including materials, designs from Benji AI, and step-by-step instructions. HomeBuilt offers three tiers: *small* (e.g., garden beds, small fences) priced at $300 to $1,000, *medium* (e.g., patios, large fences) at $1,000 to $3,000, and *large* (e.g., full outdoor remodeling) at $3,000 to $6,000. A 27.5% markup will be applied on materials sourced from local suppliers.

Supplier Subscription Fees (B2B): After meeting 50 suppliers we will begin

Krishna Bhat

charging suppliers a monthly subscription fee to list their products. We will offer the *basic* plan ($40/mo) with limited product listings and the *pro* plan ($80/mo) with premium features including analytics and promotions.

Transaction Fees (B2B): HomeBuilt will charge a 7.5% transaction fee, for Retail as a Service (RaaS), which includes a commission for retailing suppliers' products.

Costs: Costs will include marketing, packaging and distribution, software maintenance, warehouse rent, and labor costs. After the first year, we will estimate costs of $200,000/year.

VII - GROWTH

Current Progress: The HomeBuilt app and Benji AI have already been developed and we have started looking into patenting our custom model. We have completed market research and have started reaching out to Bay Area suppliers and are starting to build future relationships.

Future Progress - 5 Year Plan: Below is a breakdown of what Homebuilt's 5-year growth plan looks like. Homebuilt will transition into becoming a nationwide player in the home improvement industry.

Year	Profit	Users
1	–$75 k	2k
2	+$200 k	5k - 7k
3	+1.5 mil	10k-20k
4	+5 mil	30k-40k
5	+12 mil	50k-60k

Milestones
Year 1 - Launch app, refine user experience, aggressive marketing, partner with 50 suppliers
Year 2 - Expand product offerings to indoor remodeling, partner with 100 suppliers - supplier fees kick in
Year 3 - National expansion to 3-5 cities, expand to home repair services
Year 4 - National expansion to 3-5 cities, expand to home repair services
Year 5 - National expansion to 15 cities, establish partnerships, lead market

VIII - TEAM

HomeBuilt is led by three high school sophomores passionate about transforming the home improvement industry. With strong technical and business skills, they aim to make DIY projects more accessible.
