### Salient Recognition

---

#### **Grand Award @ Synopsys Science Fair**

MARCH 2026, SAN JOSE | [Santa Clara Valley Science and Engineering Fair](#)

Ranked Top 15 out of 1000+ students at the Silicon Valley Science Fair for work on optimizing SNN learning; qualified for California Science and Engineering Fair, #1 Category Award in Mathematics.

#### **1st Engineering @ Thermo Fisher JIC National Science Fair**

OCTOBER 2023, WASHINGTON D.C. | [Society for Science](#)

Selected as one of the Nation's Top 30 Middle School Researchers and was invited to Washington D.C. to represent California; won the 1st Engineering Award with a scholarship of \$3.5K for work to reduce Parkinsonian imbalance. [Formerly known as Broadcom Masters]

#### **International Top 40 Business Finalist @ Diamond Challenge**

May 2025, UNIVERSITY OF DELAWARE | [Horn School of Entrepreneurship](#)

Led a team of three and selected to pitch at the World Summit from 3000+ international contestants. Worked with local suppliers to develop HomeBuilt, a DIY home-improvement technology. [[Pitch](#)]

#### **4x Commendation for Youth Scientific Work**

2022 → 2025, SAN JOSE | San Jose City Council

Recognized for work on passion projects by the San Jose City Council.

### Experience

---

#### **Computational Intern @ Holmes Lab, UC Berkeley**

JULY 2024 - SEPTEMBER 2025, BERKELEY (STANLEY HALL)

Worked with a team of six interns under the apprenticeship of Dr. Ian Holmes for 2024 and 2025 summers; closely worked with post-grads

and professors in a lab environment.

- **Summer 2025:** Developed "ReconBench," a benchmarking suite for MCMC evolutionary reconstructors utilizing biologically-inferred statistical models of evolution to generate synthetic datasets capable of precisely measuring performance statistics for development.
- **Summer 2024:** Worked on data engineering pipelines to map together structural protein data with phylogeny data to identify key evolutionary segments in protein families and visualize them with an integrated protein visualizer.

## Skills

**Programming:** AI/ML, Markovian Statistics, Dynamical Systems, Data Science, Physical Model Simulation, Algorithmic Hardware Optimization, SNNs

**Neuroscience:** Processing/Analysis of Bio-data, Tractography, EEG data localization, Theoretical neuronal models

**Languages:** Python (+ Tensorflow and PyTorch), Java, C++, HTML, CSS, Environment Configuration

## Independent Researcher / Engineer

JUNE 2022 - PRESENT, SAN JOSE

Developed various passion engineering projects presented at science fairs, research symposiums, and hackathons, winning various awards.

- **THALis:** Modeling Cortico-Prosthetic Dynamics for Dexterous EEG-driven Hand Control [*IN PROGRESS*]
- **MesoNet:** Optimizing Spiking Neural Networks with Dynamic Saddle Distributions [2025, [YouTube](#), [Publication Draft](#)]
- **TractX:** A Density-Aware Streamline Exclusion System for Accurate White Matter Reconstruction [2024]
- **Balancerator:** A Wearable for Active Prevention of Falls Through GRU-based Gyroscopic Inference and Center of Mass Manipulation [2023, [Youtube](#), [To Be Patented](#)]

In free time, enjoys designing and constructing various passion projects ranging from a Touch-ID protected cookie dispenser to experimental boat designs and walkie-talkies. Loves applying engineering skills to create new inventions.

## Keynote Speaking

MAY 2024 - PRESENT, SAN FRANCISCO BAY AREA

Spoke at multiple TEDx keynote events and symposiums regarding topics revolving around emerging innovation and presentation techniques.

- **TEDxBISV '25:** Big Ideas, Little Time: The Science of Powerful Pitches [[YouTube](#), [Event Page](#)]
- **NorCal JSHS '25:** MesoNet- Optimizing SNNs
- **TEDxBISV '24:** The Missing Steps to the Big Picture (And How to Find Them) [[YouTube](#), [Event Page](#)]
